Class waste are tissues, chewing gums, lollipops...

We can also put smart bins in classes and that way track which students create most waste and which create least waste and reward those who make least waste.

We can use tablets for tests instead of paper

Class waste

How can we reduce waste?

Waste

School waste

Measuring waste

Recess waste is the most critical part of the School waste because the most waste is created during recess: tin foil, paper towels, plastic bottles and much more.

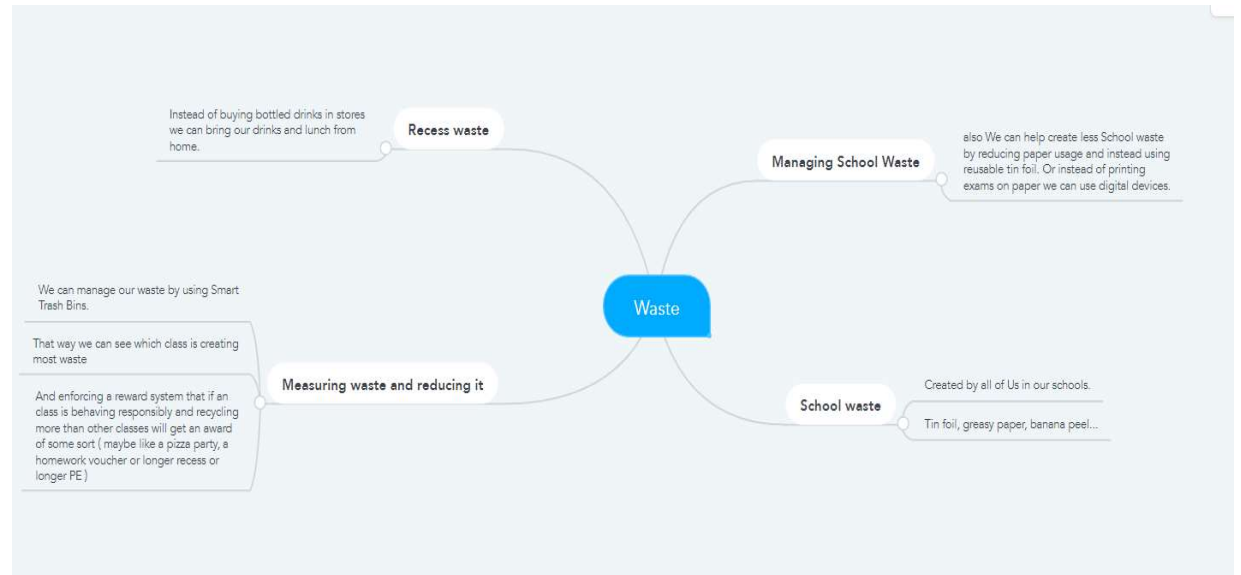

We can throw trash into a smart trash can using class id cards (same card as student id card for class bins) we can track which class is making most and which is making the least waste.

A green-tinted photograph of a poppet show. In the foreground, a dark-colored poppet with a white, fluffy headpiece resembling a wolf's head is visible. To its right, several other poppets with white, fluffy heads, resembling goats, are displayed. The background shows a window with a view of a landscape. The text "RECYCLING IN ART POPPET SHOW – WOLF AND 7 GOATS" is overlaid in white, bold, sans-serif font, centered on the image. A thin white horizontal line is positioned below the text.
